LATIHAN PERTEMUAN 6

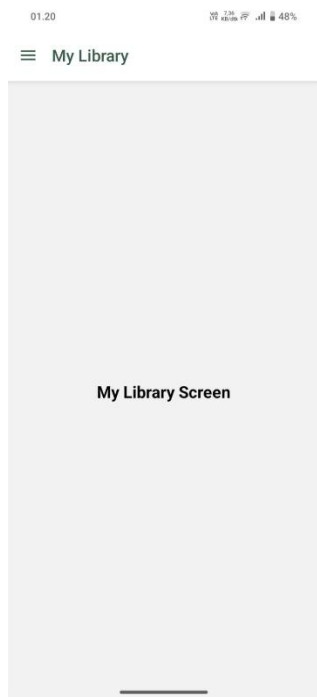

Latihan 1: Membuat sturtuk Drawer Navigasi

```
<Drawer
  screenOptions={{
    headerShown: true, // Menampilkan header dengan tombol hamburger menu
    headerTintColor: color_list.green_dark,
    drawerActiveTintColor: color_list.green,
    drawerInactiveTintColor: "gray",
    drawerStyle: {
      backgroundColor: color_list.white,
      width: 250,
    },
    drawerLabelStyle: {
      fontSize: 14,
      fontWeight: "600",
      marginLeft: -10,
    },
  }}
>
<Drawer.Screen
  name="index"
  options={{
    drawerLabel: "Home",
    title: "Home",
    drawerIcon: ({ color, size }) => (
      <Ionicons name="book" size={size} color={color} />
    ),
  }}
/>
<Drawer.Screen
  name="explore"
  options={{
    drawerLabel: "Explore",
    title: "Explore",
    drawerIcon: ({ color, size }) => (
      <Ionicons name="navigate-circle" size={size} color={color} />
    ),
  }}
/>
/>
```

```
<Drawer.Screen
  name="mylibrary"
  options={{
    drawerLabel: "My Library",
    title: "My Library",
    drawerIcon: ({ color, size }) => (
      <MaterialCommunityIcons
        name="bookshelf"
        size={size}
        color={color}
      />
    ),
  }}
/>
<Drawer.Screen
  name="account"
  options={{
    drawerLabel: "Account",
    title: "Account",
    drawerIcon: ({ color, size }) => (
      <AntDesign name="user" size={size} color={color} />
    ),
  }}
/>
</Drawer>
```

Latihan 2: Tentukan halaman apa saja yang akan dibungkus oleh Drawer

Latihan 3: Mengirimkan parameter antar screen

```
const handleReadNow = (book_id) => {  
  console.log("Read now", book_id);  
  router.push(`/books/${book_id}`);  
};
```
